

Testimonials

"My computer would not go and I called Stev-Computer who came and fixed it. I was very pleased with the result and found I could always ask for any help when required. Steve was very approachable and helpful".

Catherine B

"I told Steve that I needed a new monitor and he went out of his way to source one out and installed it in my home. Not only have I not had any problems, but Steve was friendly and offered extra advice on how to maintain my computer".

Mitcham customer

STEV-COMPUTER offers warranty and guarantees in support of manufacturers' stated warranties on all products, with quick replacement or repair, except in the case of client interference and tampering with products. We also offer a full guarantee on all work performed on site and on products assembled and repaired at our Blackburn workshop.

Our Commitment

"We commit ourselves to be a high class leader in information technology and telecommunication distribution. We are dedicated to offering our customers a wide range of products backed by knowledgeable support, competitive pricing and superior service."

About us

STEV-COMPUTER is a home-based company mainly operating in Melbourne, Victoria. We have been operating since 2002 and have been providing goods and computer services to clients on a personal basis incorporating high levels of service and attention to detail.

Steve holds qualifications from Technical Colleges in Computer Hardware and Assembly as well as networking small and medium business and home offices. His training also includes faultfinding and he has experience in common problems associated with small businesses and home offices.

Computers are hand assembled in the Blackburn workshop by trained staff and delivered to clients for installation. Computers are made to order and can incorporate the individual needs of clients and their businesses. A specialist in the small home business office, we try to please with quick turnaround times for orders and deliveries.

Recycling

Good used computer systems are re-built and given to people who do not have a computer and cannot afford a new one.

Good parts are removed and re-used to build up recycled computers. Old parts and broken components are taken to a recycling depot in Surrey Hills where 97% of parts are used.
